EXPERIENCES

Full Stack Developer
DZN Solutions, Karachi

May 2023 - Present

Currently, at DZN Solution, I excel in both frontend and backend roles, contributing to diverse projects such as e-commerce platforms, airline reservation systems, pet QR systems, and inventory management. My work involves API development and integration, utilizing AJAX, jQuery, SQL, and Bootstrap to enhance functionality and user experience..

PHP & Laravel Developer
QF Networks, Karachi

Jan 2023 - Apr 2023

While at QF Networks, I focused on customizing WordPress plugins and adding new features using PHP, Laravel, JavaScript, jQuery, AJAX, HTML/CSS, and Google APIs. My responsibilities also included managing hosting, database administration, and overseeing project management tasks.

Web Developer - Training
Hidaya Institute of Science & Technology

June 2021 - Oct 2021

After graduating, I joined HIST Technology for a five-month web development training program. During this time, I gained practical experience in PHP 8, focusing on Object-Oriented Programming, form validation (both client and server-side), integrating built-in modules, session and cookie management, error handling, and email communication. Additionally, I learned about JavaScript DOM, Bootstrap 5, AJAX, SQL databases, the XAMPP server, and web hosting.

Web Developer - Project Based
HAZ Software Solution (Remote)

June 2021 - Present

During my graduation, while working for HAZ Software Solutions, I focused on a project centered around backend development using PHP and MySQL database. My primary responsibilities included PHP programming, database management, testing, and debugging to ensure seamless functionality and address any encountered issues.

PROJECTS LIST

The Kapaas
An e-commerce website for a clothing brand, focusing on both backend and frontend aspects using Laravel. I handled frontend, backend development, database management, and built modules such as DataTable and Carousels and Bootstrap.

HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Laravel, Build in modules, stripe payment.

Woofio -
Pet Finding

The Pet Tracking Web System enables pet owners to register their pets by scanning a QR code. After registration, owners can manage multiple pets via a dashboard, view QR codes, and update pet details such as breed and vaccination records. If a pet goes missing, anyone who finds it can scan the QR code to access the pet's profile, contact the owner, and share their location.

HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Laravel, Build in modules, responsive.

LMS System

The Portal serves various roles, with administrators overseeing all functions and managing other aspects of the system. Teachers contribute by creating courses, defining topics, and uploading relevant materials for students to access within their respective courses. Using Core PHP, MySQL, Built-in-module, HTML, CSS, JavaScript, Bootstrap

HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Core PHP, Build in modules, responsive.

Slot Gaming

The Slot Gaming web-based project was a large-scale effort, featuring a detailed system from Super Admin to Game Owners, who oversee multiple rooms. Each room has its own staff, responsible for tasks like adding players, assigning points, and viewing player face recognition. Staff members also keep daily records, including attendance, machine readings, and player history.

Laravel, Face-API, JavaScript, JQuery, AJAX, Bootstrap, HTML, CSS

Quiz System

I developed a Quiz System website with roles for admin, teacher, and user. Admins manage users, quizzes, and results. Teachers create, assign, and view quiz results. Users participate in quizzes and view their own results. The system offers a seamless platform for administering quizzes and facilitating learning.

HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Laravel, Build in modules, responsive.

ADA Chrome
extension

I built a Google Chrome Extension using Laravel, Google API, Bootstrap, HTML/CSS, SERP API, SQL, JavaScript, AJAX, and jQuery. It fetches results from the Google Search API, organizes them, and displays them efficiently.

Google, SERP API, HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Laravel, Build in modules.

Woofio Mobile
APP

Developed and deployed a Pet Tracking Mobile App in React Native for iOS and Android, featuring QR code-based pet registration, management, and lost pet recovery with real-time owner contact and location sharing. Released on Apple TestFlight.

React native, Laravel API, Google maps, QR Scanner
